# Stories to tell – Storytelling

Remote  
Sensing

Hogwarts

Create a sense of wonder for the "hidden" processes in nature.

bridge the gap between RS and the people who will use it

CREATE AN UNICORN

Start a revolution in measuring what we see (and more)

Educate <sup>academia</sup> <sup>researchers</sup> <sup>& policy makers</sup> in using remote sensing

Get scientists (in spe) experience how important it is to present study results in a way that motivates, and maybe leads to change of mind.

Create a better sustainable world with equal access to water, using RS tools <sup>for</sup> drought monitoring

Explore uses of Remote Sensing in an Ecological & Environmental context

Creating Community of Remote Sensing researchers at London University (CML-EB)

Educate <sup>Policy Makers</sup> <sup>Researchers</sup> & Policy makers on current ecological & environmental problems (how to solve them)

AUDIOVISUAL DATA & THEIR POTENTIAL

Experiment with new forms of visualization.

Make people experience how the data <sup>relates</sup> to the physical world around us

Create an immersive educational experience

Make VR education

Dementia

# Learning Experience Design

The background of the slide is a complex, abstract geometric pattern composed of numerous overlapping triangles and polygons. The color palette is warm and varied, featuring shades of yellow, orange, red, and pink. The text 'Learning Experience Design' is centered in the upper portion of the image in a bold, black, sans-serif font.
