**WHICH MEDIA-TECHNOLOGY
HAS THE HIGHEST IMPACT
ON JOURNALISM TODAY?**

**In a few months from now,
we won't be able to distinguish
between deepfakes and 'normal'
videos.**

VERIFICATION STRATEGIES?

«Amnesty International is already grappling with some of these issues. Its Citizen Evidence Lab verifies videos and images of alleged human-rights abuses. It uses Google Earth to examine background landscapes and to test whether a video or image was captured when and where it claims. It uses Wolfram Alpha, a search engine, to cross-reference historical weather conditions against those claimed in the video.»

Fake news: you ain't seen nothing yet,

VERIFICATION STRATEGIES?

Media: unique key that only the signing organisation—or the originating device—possesses.

VERIFICATION STRATEGIES?

Decentralized timestamping on the blockchain

VERIFICATION STRATEGIES?

«In an initial round of testing last June, researchers were able to identify “speaker inconsistencies and scene inconsistencies,” two markers of video that’s been tampered with, with 75% accuracy in a set of hundreds of test videos.»
